- K-37 #155427 Plumbing
- L-04 #71451 Boilers, Process Piping

BENEFITS

- Quick response
- Early identification of problems
- Job done right the first time
- Decreased water consumption

Midstate Mechanical Inc. was established in 1986 and provides a wide range of plumbing and piping services for its customers throughout Arizona. From sanitary and domestic water applications to process piping, air and gas piping, and chilled water systems; and from retrofitting the smallest building to new installations, we get the job done.

We focus on design, innovation and prefabrication in the installation, upgrades and maintenance of piping and plumbing systems. When our team is involved, you can be sure of proper application quality and cost effectiveness.

For nearly 30 years, Midstate has engineered, installed, maintained and repaired piping systems of every size and complexity. Our vertical market experience includes K-12, universities, hotels, office buildings, hospitals and bio-tech laboratories.

PLUMBING & PIPING CAPABILITIES

Services include backflow testing and repairs, drain cleaning, hydro jetting, water-heater replacement, re-piping, pump overhauls and replacement, video camera pipe inspections, water booster packages, and all types of pumps from centrifugals, submersible, vertical turbine and multi-stage to positive displacement styles such as gear and vane pumps.

Our response ranges from reactive service calls to scheduled tests, inspections and drain cleaning.
