Procurement Compliance Questionnaire

Instructions

Arizona Revised Statutes (A.R.S.) §15-213(F) requires school purchasing cooperatives to have a systematic review of their purchasing practices performed in conjunction with their annual audit, using guidelines that the Arizona Auditor General established. The review's purpose is to determine whether the cooperative complied with the procurement laws and applicable rules when awarding contracts that Arizona school districts use. Cooperatives meet this requirement by having their audit firm complete this procurement compliance questionnaire using the guidelines prescribed below by the Arizona Auditor General. The Arizona Auditor General may reject those Procurement Compliance Questionnaires not meeting the minimum requirements.

- The audit firms must obtain sufficient, appropriate evidence annually for each question to satisfactorily address whether the cooperative complied with the State's procurement laws and applicable rules. The audit documentation must support the comments and the evidence must be included in the audit documentation. If the evidence was obtained and documented during the financial statement audit, that evidence may be referenced to answer related questions.
- The questions are considered "stand alone" and comments for cited deficiencies should address the specific question. Auditors should not repeat a comment on multiple questions. The evidence may be obtained through test work, observation, examination, and client assertion. However, client assertion alone is not adequate evidence to support "Yes" answers on the questionnaire.
- The audit firm must determine the cooperative reviewed documents and transactions and provided sufficient evidence of approval including signatures or initials and date of review.
- For questions related to the establishment of policies and procedures, the audit firm must gain an understanding of the cooperative's internal controls and perform sufficient test work to determine that the procedures were implemented, followed, and systematically communicated to employees and member districts, as applicable.
- The minimum number of items to test has been specified for each question. The items selected should be representative of the population. Population and samples sizes used for test work should be documented in the comment box of the related question.
- The sample size should be expanded if the audit firm cannot clearly determine whether the cooperative complied with the procurement laws and applicable rules on that question.
- A "Yes" answer indicates that the audit firm has determined that the cooperative complied with the State's procurement laws and applicable rules on that question, and a "No" answer indicates the cooperative did not comply. However, the Arizona Auditor General makes the final determination of compliance based on the evidence presented in the questionnaire, audit reports, audit documentation, and any other sources of information available.
- The audit firm must adequately explain all "No" answers in the comment box below the question. Deficiencies must be described in sufficient detail to enable the Arizona Auditor General to determine the nature and significance of the deficiency for:
 - a. Assessing compliance with the State's procurement laws and applicable rules,
 - b. Describing the deficiency in a letter, and
 - c. Testing compliance during a review.

The description should include the number of items tested and the number of exceptions noted and any other relevant information that would provide context for the deficiency.

- The audit firm must adequately explain all "N/A" answers in the comment box below the question unless the reason for the N/A is obvious.
- The questions in the questionnaire do not address all requirements of the State's procurement rules and applicable laws. If the audit firm is aware of noncompliance with any requirements that are not addressed in this questionnaire, the audit firm should include those deficiencies on a separate page attached to the questionnaire, as applicable.

The audit firm must make the resulting documentation supporting the audit firm's answers on the questionnaire available on request for the Arizona Auditor General to review. To facilitate this review, the audit firm may wish to include a copy of the questionnaire with references to the procedures performed for each question, with the audit file.

Procurement Compliance Questionnaire

Objective: To determine whether the cooperative has followed the State of Arizona procurement laws and the School District Procurement Rules to promote fair and open competition among vendors to help ensure the cooperative's members are receiving the best value for the public monies they spend.

The audit firm must select and test the lesser of 50 percent or 15 of the cooperative's contracts awarded during the fiscal year to be used by Arizona school districts, but no fewer than 5 awarded contracts. All contracts awarded for like items should be considered a single contract in applying the sample size. These sample sizes represent the minimum level of required test work. Audit firms should use their professional judgment in determining whether a larger sample is needed.

In the parentheses provided below, indicate the population size and actual number of contracts tested and total number of contracts awarded. If all contracts are tested, indicate such in the "Comments." Of the total awarded contracts selected for testing, at least 40 percent must be competitive sealed bids and at least 40 percent must be competitive sealed proposals. If the 40 percent thresholds cannot be met because of an inadequate population size, the audit firm must test all contracts awarded through competitive sealed bids or proposals, as applicable. Of the contracts selected, at least 1 awarded contract should be for traditional construction (design-bid-build) and specified professional services, and at least 1 for construction-manager-at-risk, design-build, job-order-contracting, or qualified select bidders list, as applicable.
